dynamical systems in population pdf - Saddle-node equilibrium points on the stability boundary of nonlinear autonomous dynamical systems
Sun, 15 Apr 2018 12:55:00 GMT
Dynamical Systems: Vol 33, No 1 - Taylor & Francis - Chaos theory is a branch of mathematics focusing on the behavior of dynamical systems that are highly sensitive to initial conditions. 'Chaos' is an interdisciplinary theory stating that within the apparent randomness of chaotic complex systems, there are underlying patterns, constant feedback loops, repetition, self-similarity, fractals, self ...

Chaos theory - Wikipedia - The logistic map is a polynomial mapping (equivalently, on one-dimensional nonlinear recurrence relation) of degree 2, often cited as an archetypal example of how complex, chaotic behaviour can arise from very simple non-linear dynamical equations.
