Plant growth analysis presents
difficulties related to statistical
comparison of growth rates, and
the analysis of variance of
primary data could guide the
interpretation of results. The
objective of this work was to
evaluate the analysis of variance
of data from distinct harvests of
an experiment ...

growth is exhibited when the rate
of change "the change per
instant or unit of time" of the
value of a mathematical function
is proportional to the function's
current value, resulting in its
value at any time being an
exponential function of time, i.e.,
a function in which the time value
is the exponent. Mon, 16 Apr
