Approach - Oriental Journal of
Chemistry is a peer reviewed
quarterly research journal of pure
and applied chemistry. It
publishes standard research
papers in almost all thrust areas

of current chemistry of academic
and commercial importance.

Articles - PMMA-layered silicate
nanocomposites were prepared by
in-situ suspension polymerization
and emulsion polymerization. For
the suspension polymerization,
the silicate layers were dispersed
individually in water, and we
speculate that they are adsorbed
on the surface of monomer
droplets. Tue, 25 Jun 2013

- Soil is a mixture of organic
matter, minerals, gases, liquids,
and organisms that together
support life.The Earth's body of
soil is the pedosphere, which has

four important functions: it is a
medium for plant growth; it is a
means of water storage, supply
and purification; it is a modifier
of Earth's atmosphere; it is a
habitat for organisms ... Thu, 19
